

## EASY TOUCH

## SERIES W1

The new W1 EASY TOUCH Series applicators for hot-melt adhesives with gear pump are significantly innovative in terms of simplicity of use, productive flexibility, maintenance operations and costs, speed of installation, easy programming, high safety standards, exceptional reliability and total integration with any existing assembly line. They represent a quality solution for application of thermoplastic hot-melt adhesives in several sectors. The EASY TOUCH systems are equipped with a new microprocessor with 7" LCD Touch Screen colour display, through which, with a single graphic interface showing all sections of the system (tank, manifold, hoses and guns). The operator is supported in everyday activities like managing and setting temperatures, pump control, setting machine parameters and glue sections, and integration and communication with any external units, allowing for immediate use of the system even by non-specialized personnel, without any problems involving codes or foreign languages to be interpreted. The EASY TOUCH melters have a new melting tank, entirely redesigned, to distribute the heat more evenly over the entire surface, thus obtaining a more precise and effective melt, with significant energy savings. The particularly well-finished design makes the system appreciable even in aesthetic terms. Every part of the applicator can be inspected easily by opening the practical body system. EASY TOUCH Applicators - customizable in several configurations and capable of satisfying all gluing needs - allow the operator to work in complete safety and to significantly optimize application times without wasting time uselessly.

# EASY TOUCH W1

## 1. NEW MICROPROCESSOR WITH 7" TOUCH SCREEN DISPLAY

The following are some of the main functions of the new user interface: sequential channel heating, machine ready and pump start signals, absolute maximum temperature protection system, Economy Dual Mode, Weekly Program with Daily ECO function, colour status button with real time diagnostics and Screen Saver function, hose-gun coupling thermal regulation deactivation, LOG file for system register, Life Hours/Work Hours/Pump Cycles counter, machine parameters and Firmware updates uploaded and downloaded through a USB port, customizable system section and glue program names, and parameter Copy/Paste function.

## 2. GEAR MOTOR

The applicators are fitted with variable speed AC motors controlled by an inverter positioned horizontally to obtain reduced overall dimensions and easy access both for inspection and maintenance, thanks to a quick connector and an easy to open body system.

## 3. NEW MELTING TANK WITH 1.5 L CAPACITY

The new tank was entirely redesigned to ensure perfect efficiency in terms of melting evenness and capacity. The large loading inlet open on 3 sides makes filling easier, optimizing cleaning and maintenance operations. The heaters are positioned on the bottom of the tank and across the melting fins, and are specifically designed to create a special grid to improve the melting of the glue more efficiently, so it can slide directly towards the pump drawing spot. This heating system allows a homogeneous and uniform distribution of the heat improving the thermal efficiency of the whole system with a consequent energy saving. The rapid discharge facilitates the collection of any impurities in the adhesive or burnt glue residue, conveying them to a single sump and preventing them from being sucked up by the pump and causing a machine shutdown, also allowing for quick cleaning operations either for maintenance purposes or to replace the adhesive.

## 4. GLUE FILTER

Easy to access and replace, it guarantees excellent quality of application, preventing impurities in the adhesive from clogging the nozzles. There is a wide range of available models (with single or multi-layer filtering micro-mesh, and different pitches starting from 200 micron) depending on the type of adhesive used.

## 5. HIGH PRECISION GEAR PUMP

Gear pumps of different capacities (0,8 - 3,0 - 7,0 - 10 and 20 cc/rev) are available with the same dimensions. These pumps are absolute precise and reliable, made of fully hardened super-quick steel. Like all internal parts of the applicator, the pump is also easy to remove in case of maintenance or replacement.

## 6. PRESSURE CONTROL DEVICE

A sophisticated control system shows the adhesive output pressure on the applicator display. This view can be combined with a traditional digital pressure gauge that shows the pressure of the adhesive in bars.

## 7. QUICK PRESSURE RELEASE AND REGULATION VALVE

Maintains the pressure at the amount set, and ensures the utmost safety during system use. Adhesive pressure is released into the system automatically and safely, also in the event of an emergency.

**EASY TOUCH**

## GENERAL SPECIFICATIONS

ADHESIVE TYPOLOGY AND VISCOSITY	hot-melt up to 70.000 Cps
OPERATING TEMPERATURE	50°C÷210°C (120°F÷410°F) standard version - 50°C÷230°C (120°F÷450°F) HT high temperature version
HOSE/GUN CONNECTIONS	2, 4 (fitting thread 1/2"x20 UNF)
TANK CAPACITY	1,5 kg (3,3 lb)
MELTING RATE	3 kg/h *
WEIGHT (EMPTY)	55 kg (121 lb)
MACHINE DIMENSIONS (LxHxW MM)	553 x 637 x 450 mm
TANK OPENING DIMENSIONS (MM)	160 x 95 mm
TANK	internally coated with PTFE scratch-resistant non-stick treatment, heated fins and quick drain valve
MANIFOLD	coated with hard oxidation treatment and glue filter integrated
WARM-UP TIME	35'÷40' starting from ambient temperature (0°C÷45°C (32°F÷113°F))
FASTENING	slots for M8 screws

## ELECTRICAL SPECIFICATIONS

VOLTAGE	1/N/PE AC 230 V + 10% 50/60 Hz, 3/N/PE AC 400V + 10% 50/60 Hz
WATTAGE (without hoses and guns)	1,7 kW (8 A)
MAXIMUM POWER PER CHANNEL	1,0 kW

## MICROPROCESSOR SPECIFICATIONS

TEMPERATURE CONTROL	PT100 + 0, 5°C (1°F) - Ni120 e NTC (on request)
MICROPROCESSOR	7" Resistive Touch Screen - LCD TFT LED lighted colour display - resolution 800x480 pixel (USB, Ethernet, and Windows CE software)
FUNCTIONS	Economy, Clock, Weekly Program, Maximum Temperature Alarm, Sequential Heating Zones
SAFETIES	by-pass safety valve, over-temperature automatic protection, emergency stop input alarm, glue pressure release, "real time" diagnostics
OPTIONS	level sensor, quick pressure release valve and flow regulation, integrated glue pattern control, automatic filling system

## GEAR PUMP SPECIFICATIONS

PUMP TYPE	gear single flow				
PUMP MAXIMUM SPEED	0,8 cc/rev pump	3,0 cc/rev pump	7,0 cc/rev pump	10 cc/rev pump	20 cc/rev pump
MAXIMUM PUMP RATE	3,8 kg/h *	14 kg/h *	33 kg/h *	48 kg/h *	96 kg/h *
MOTOR SPECIFICATIONS	inverter-controlled 0,25 kW variable speed reduction gear ratio 1:20				
MAXIMUM WORKING PRESSURE	55 bar				

\*(depending on used adhesive typology)
